2016 TSU-AEOP Research and Engineering

STEM Research opportunity for High-School Students

JUNE 13–JULY 22, 2016

The Department of Engineering of Texas Southern University, in collaboration with AEOP will be hosting a summer Research program (REAP) which provides opportunities for high school students from historically underrepresented and underserved populations. Students gain hands-on work experience in scientific research and development programs on a university level. REAP students are exposed to real world scientific research and are able to see themselves making a living as scientists and researchers. Selected students will be awarded a $1500.00 stipend for their summer research experience in a university lab.

The REAP Experience is designed to:

♦ Motivate students toward a career in science, mathematics, or technology.
♦ Expand students’ background and understanding of scientific research.
♦ Engage students’ active participation into the philosophy and objectives of scientific research.
♦ Expose students to science experiences not readily available in high school.
♦ Introduce students to the real world of research in these fields.

APPLICATION INFORMATION:
REQUEST FOR APPLICATION CAN BE MADE TO
MARCIA ROBIN-STOUTE
EMAIL: robinms@tsu.edu
PHONE: 713-313-7673
APPLICATION DEADLINE: APRIL 29, 2016
