

EPA Aquatic Ecosystem Specialist (Part Time)

(Posted on 5/28/2015)

The EPA Environmental Research and Business Support Program has an immediate opening for an Aquatic Ecosystem Specialist with the Office of Research and Development at the EPA facility in Narragansett, Rhode Island. This research will involve experiments designed to elucidate the fate and effects of contaminants of emerging concern in the environment including development of analytical methods for detection/measurement, toxicity, bioaccumulation, sublethal endpoints and ecological effects.

Qualifications include: a B.S. or B.A. in biology, chemistry, environmental science, toxicology, oceanography, or a related environmental sciences field earned within the last 24 months; general laboratory and field experience in the environmental sciences; ability to swim; basic familiarity with small boats; *it is desirable for the applicant to have experience working with analytical instrumentation and/or toxicity tests.*

To apply, go to www.zintellect.com, make an account, and enter the reference code EPA-SSP-0015-2 to find the position posting.
