

2016 TSU-AEOP Research and Engineering

STEM Research opportunity for High-School Students

JUNE 13– JULY 22, 2016

The Department of Engineering of Texas Southern University, in collaboration AEOP will be hosting a summer Research program (REAP) which provides opportunities for high school students from historically underrepresented and underserved populations. Students gain hands-on work experience in scientific research and development programs on a university level. REAP students are exposed to real world scientific research and are able to see themselves making a living as scientists and researchers. Selected students will be awarded a \$ 1500.00 stipend for their summer research experience in a university lab.

The REAP Experience is designed to:

- ◆ Motivate students toward a career in science, mathematics, or technology.
- ◆ Expand students' background and understanding of scientific research.
- ◆ Engage students' active participation into the philosophy and objectives of scientific research.
- ◆ Expose students to science experiences not readily available in high school.
- ◆ Introduce students to the real world of research in these fields.

APPLICATION INFORMATION:

REQUEST FOR APPLICATION CAN BE MADE TO

MARCIA ROBIN-STOUTE

EMAIL: robinms@tsu.edu

PHONE: 713-313-7673

APPLICATION DEADLINE: APRIL 29, 2016
